

PROFILIGHT

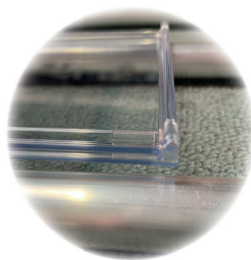

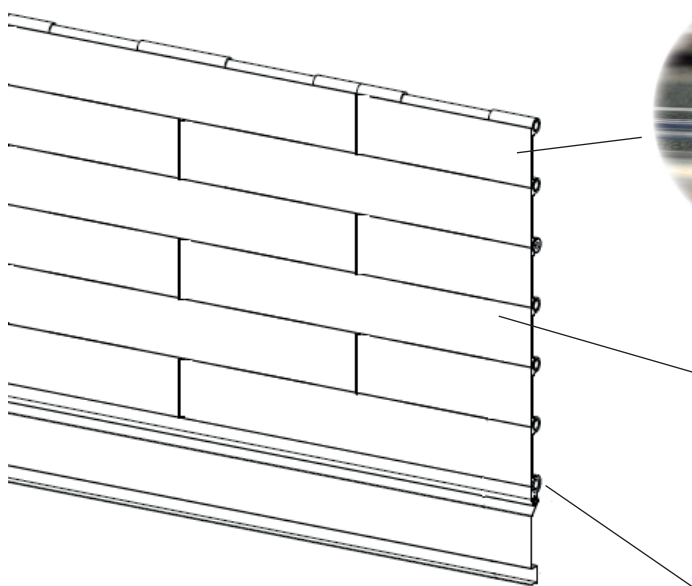

transparent security roller shutter

glass

PROFILIGHT GLASS is the perfect solution to enhance safety, visual, commercial establishment expositions, houses, industries and high-risk sites such banks, airports... with transparency.

PROFILIGHT GLASS's conception allows a reduced-encumbrance winding system, to run silently, a high wind resistance and an easiest installation.

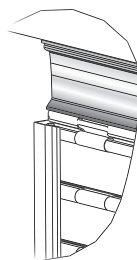

PROFILIGHT GLASS can be completely transparent or partially (with the addition of metal curtain blades).

High resistance polycarbonate transparent modules. (anti-UV, anti-yellowing, lg=630mm, ep=34).

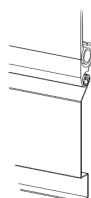

Shutter with optimised resistance in order to obtain large dimensions.

Specific retaining claw allowing perfect sealing and protection against winding scratches.

Specific attachments to hang the shutter to the regular slats of the metallic roller shutters

It allows the use of all brand and type of motorised axis (central, tubular, lateral side...)

Invisible and possible integration of system of protection against intrusions made by grinders PROFILBLOCK

Bottom rail of specific liaising allowing the establishment of all the aluminium or steel bottom slats.

MARKETING

IN SPARE PARTS TO BE FITTED BY THE CUSTOMER

- Control of deadlines by the customer, better responsiveness
- Reduction of the cost price
- No minimum order
- Reduced customs fees for export

CUSTOMIZED CURTAIN

- No manufacturing, no stock and no waste for the customer
- Mastered deadline
- Optimized and controlled selling price (internal manufacturing PROFILMAR)

DIMENSION DETAILS

Max lenght	12000 mm
Max lenght	8000 mm
Max surface	72 m ²
Available Lacquering	Bottom Slat & guide rails
Weight / m ²	10 Kg/m ²
Slat pitch	100 mm
Winding diameter (for 2500mm ⁽¹⁾ height)	350 mm
Axle tube	133 mm

⁽¹⁾ See winding tables

CERTIFICATIONS

CETIM - N° 0526-CPD-G09002

CSTB - N° RA18-0149

CNPP - N° MD 15 01 12

CNPP - N° MD 15 01 14

CETIM - N° 0526-CPD-G09002

Optional

Qualicoat certified lacquering offers durability and aesthetics in the outside environment.

TECHNICAL CONTRIBUTIONS

- General aesthetics
- Transparency
- Polycarbonate module (lgth = 630mm THK = 3.0mm)
- Anti-UV and anti-yellowing treatment
- Increase in trade exposure
- Silence of use (seals)
- Available Lacquering for bottom slats, slats and guide rails
- Qualicoat lacquering (optional)
- 100% compatible with roller shutter slats
- Reduced weight (8.5 kg / m²)
- Perfect sealing between modules

OUR MANUFACTURING

For shops, industries, airports and banks, **PROFILIGHT GLASS** keeps an unobstructed view while maintaining optimal security. In all its applications, **PROFILIGHT GLASS** increases the commercial exposure of any storefront and offers 100% clearance at the opening. Its transparent modules, and the possible lacquering of the aluminum profiles and bottom slats, multiply the architectural perspectives in many areas.

French manufacturing, we put all our know-how at your service.
